Mr. M. Spagna,
 5 Douglas St,
 San Francisco, Cal.

Dear Sir:

We understand you have recently acquired United States government license as a radio operator.

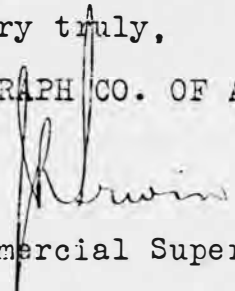

We have several vacancies in our service for ship wireless operators and are desirous of filling them with young men capable of advancing in the wireless profession.

We are now erecting, and will open during the present year, two large duplex stations, one near San Francisco and one near Honolulu, while others will follow in the Phillipines and the Far East. These two stations in the course of erection will require the services of about fifty operators. The most modern living quarters and comforts will be provided for the staff.

It is our intention to select the men for these stations from ship wireless operators in our service. If you are considering Wireless as a future profession, we would be glad to receive a visit, or a written application from you. If the latter, full particulars of your qualifications should be given.

Yours very truly,

MARCONI WIRELESS TELEGRAPH CO. OF AMERICA,

 Commercial Superintendent.

JRI-Y
