Dear Bill:

Enclosed you will find various items turned over to me by Ben Beckerman's niece which I thought you might find of interest. Use them as you wish. I was very much interested in the picture of the 10" spark coil on the old dominion S/S Hamilton in 1908. I have never seen a picture of a ships installation showing a spark coil hi. It is an enlargement of the one showing Ben as you can see when he just got started.

Hope you can find something of interest as I do not wish to keep them because I am getting too old and they would get thrown away if anything happened to me.

Keep well OM and as I have said before I and I hope all the other members appreciate the wonderful job you are doing for us.

Cordially,
Dick
