

10 July 75

Dear Bill,

Many thanks for the two letters regarding the lists of antique wirelessmen. Things have changed and there will be more to it than I thought when I first wrote.

The book from which I am taking this information is a privately bound book containing 11 issues of Marconi magazines.

The book is in very poor shape, what with the paper so very brittle that it must be handled with care. It would not do for use as a reference on a library shelf, however I am now trying to arrange for the owner, a judge recently retired, to will it to the SOWP. As he is just a kid of 60, I doubt that I will be here to see that he does just that.

I borrowed the tome so I could research the names of the people of those old days. All in all, I found 27 that I am certain I knew at one time or another. Each volume of the magazine (there are eleven, the Dec '14 issue was not bound in) devotes from four to about eight pages of personal notes and assignments, swaps and other things of interest to shipmates of the airwaves. Rather than paw through all those fragile pages hunting for names, I copied out the names of all operators in the eleven issues.

When this list was made up on the mill, from the pencil lists, I thought I'd ask you if it would be of use. The answer being yes, I started double-checking spellings and initials and such. This time, of course, I read each and every item fully; not just names of men and ships. The stories that carried the names of the men became highly interesting....some very brief and some long, trials, tribulations, sicknesses, accidents, heroics and humor. I thought that the entire items, with an index of names, would be much more interesting than just saying Joe Doaks on the Dorchester, etc.

So-o-o-o, I have copied all the personnel pages from all eleven issues (quite a hunk of paper). Instead of a fragile book with stuff hidden all through it, what will be much more interesting is a stack of typed pages plus what I am not busy on, an index of men's names. This index will be similar to the laid-aside list from which I sent you the dry copies, but for the index column two numbers are used..... like 319.17.....this means that the man's name will be found on page 317 and item or paragraph 17. Thus, if you look up, in the long index, the name of John Doe and find him as 495.7 and listed as being aboard the Stanley Dollar, it might be interesting to check the text on the page indicated, item 7 which will clue you to the entire item regarding John Doe at that time. Further search will reveal John Doe listed several more times down the index column, maybe, with shipmate senior or junior or assistant.

Some of the paragraphs are merely "Joe Doe is now on the Parthian."

Some of the paragraphs give quite interesting stories of events, such as the tale of one wirelessman who dived over the side to save the life of another wirelessman who thought he could swim, tales of shipwrecks, discharges for disobedience, resignings for military service, a train-ferry crossing one of the Great Lakes which began taking on water fast; loaded freight cars were jettisoned forward; the stern, now heavy, sank, tossing the bow aloft, drowning the wirelessman in his cabin belting out his CQD and slipping suddenly under astern.

Some of these events might make good stories for fill or just tales of the sea....possibly there are men around who can recall the events.

So, this generally being the story of my life - I never do anything half way, generally I do it twice or thrice and it never comes out like it started, I will get the foolscap to you as soon as I can get the new index finished (unless I think of something ELSE to go after).

I have hectored and hounded one Frank Hogan of Carmichael into sending in his hard-earned dough for a membership. He is quite a character; long time in the Army, mostly at Honolulu, long time with PAA flying across all the waters of the world, operating radio for the Highway Department of California and now a constructor and serviceman on the state's microwave and metering system - and a busy ham - W6ISX. We had to threaten to boycott him on the air - a great procrastinator. He should be able to tell you some wild tales of the PAA service.

So, with patience, Señor, I hope to finish the opus before my fingers wear down to the SECOND knuckle on this mill.

73, you and your lady,

As'
